GEOGRAPHER

Look for key geographical vocabulary.

Do you know what all the key terms mean? How can you improve your understanding?

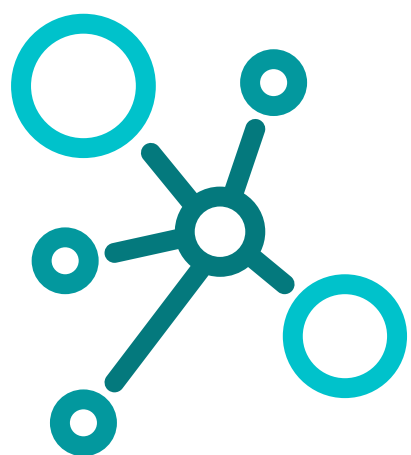

Interpret data, graphs and charts carefully.

What is the data showing? What can you infer from the data? Is it what you expected based on your geographical knowledge? Is it reliable?

Look for key command words.

What are you being asked to do? What order should you do things in? How should you present your answer?

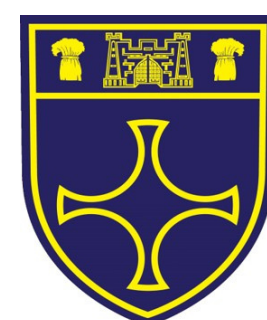

Look for links with things you already know.

Where have you heard these words or concepts before? What prior knowledge do you need to fully understand this?

'Geography explains the past, illuminates the present and prepares us for the future. What could be more important than that?'

- Michael Palin
